## PROFILE

Results-driven Full Stack Developer with 1.5 years of hands-on experience at VrCyn IT Consultant and e-Beta Innovations LLP. Skilled in Django, Django-Ninja, React.js, Next.js, and PostgreSQL, I specialize in developing high-performance web applications that fuel business growth. I excel at managing projects end-to-end, delivering scalable, innovative solutions that align with client objectives and enhance user experiences.

## WORK EXPERIENCE

### e-Beta Innovations LLP

React Front-End developer | Full Time SEPTEMBER 2023 - PRESENT

- Actively developing robust and responsive applications using React.js and Next.js to deliver seamless, user-centered experiences.
- Collaborating with cross-functional teams to implement creative UI/UX designs, focusing on both functionality and visual appeal.
- Committed to maintaining high code quality, optimizing performance, and ensuring consistent cross-browser compatibility.
- Continuously expanding knowledge of the latest web development trends and technologies to drive innovation and improve project outcomes.

### Current Project: Pay2Gig

- Overview:** Pay2Gig is a cutting-edge platform designed to connect freelancers and clients for efficient project management and collaboration. It enables smooth task coordination, secure transactions, and effective communication to enhance project execution and satisfaction.
- Current Responsibilities:**
  - Designing and developing dashboard-related pages with a focus on usability and functionality.
  - Integrating APIs and transforming static pages into interactive, dynamic components.

### VrCyn IT Consultant

Django Full Stack web Developer | Intern JANUARY 2023 - JULY 2023

- Developed and maintained responsive web applications using HTML, CSS (SCSS), and JavaScript, ensuring a seamless user experience across devices.
- Collaborated with back-end developers for smooth integration and efficient data exchange using AJAX.
- Utilized the Django framework for project development, including app setup, URL configuration, view functions, template rendering, and database management via the admin panel.
- Implemented Django-Ninja for API development, handling app setup, URL routing, validation, serialization, and model management.
- Conducted quality assurance testing with pytest to ensure application reliability and performance.
